

Security Questions and Unisys Answers

Can't keep up with endpoint security? We can show you how to take them off the board.

Can't keep sensitive data inside the data center? We can show you how to micro-segment your key assets, to prevent loss.

Can't keep legacy equipment current with your security plan? We can show you how to cryptographically isolate them.

Can't keep your suppliers and eco-system members secure? We can show you how to establish communities of interest that span corporate borders.

Can't keep away from the efficiencies of clouds? We can show you how to apply your security to anyone's cloud.

Can't keep paying for all those data centers? We can show you how to consolidate them with virtual segmentation and enclaves.

Security Solutions: Advanced. Efficient. Trusted.

At Unisys, we provide mission critical physical and logical security solutions to many of the world's most important enterprises. Unisys unifies our highly advanced products and efficient, cost saving managed and professional services. Our experienced consultants and trusted advisors design solutions addressing both the risk and business perspectives of our clients, delivering security that works for today.

Yesterday's security has fallen behind the needs of today's enterprises. The advances in threats, changes in technology, tightening of budgets, rigorous regulations, and limitations of staff all conspire to keep even the most well intentioned enterprise at great risk. Unisys has built a better way to address these threats with new approaches that give you the security, affordability, and management control you need **today**.

Why Unisys?

Unisys has quietly been successfully protecting some of the most important (and most attacked) public and private sector enterprises for decades. To do that, we've developed innovative advanced technology that solves increasingly complex problems in new ways, built out global security infrastructures providing mandatory cost and labor efficiencies, and honed an elite team of consulting experts that bring real-world experience to solving problems.

Unisys' new approach combines these into a unique set of converged capabilities that defends extended enterprises, detects additional threats, minimizes exposure and risk, and speeds response – all while lowering costs. We've engineered world-class physical and logical security capabilities into a comprehensive, integrated, security environment to deliver more flexible and automated policy enforcement; smarter and faster detection and prevention; and more precise and actionable diagnoses and remediation.

Award Winning Security Solutions Portfolio:

ADVANCED PRODUCTS

LOGICAL

- Stealth(core)
- Stealth(cloud)
- Stealth(compute)
- Stealth(mobile)

PHYSICAL

- Image Processing
- Identity Management
- LPSS
- Fraud Detection

EFFICIENT MANAGED SERVICES

- SIEM
- Endpoints
- Firewalls
- Applications
- Assurance
- GRC
- Threat Analysis
- Data Loss Prevention
- Video/Image Management

EXPERIENCED PROFESSIONAL SERVICES

TECHNICAL

- Testing
- Incident Response
- Architecture

STRATEGIC

- CISO Advisory
- Security Assessments
- Security Planning
- Systems Integration

“Unisys is more focused on making information-rich targets invisible in the networks. Unisys Stealth not only strengthens data security but also enables effective controls for endpoint access.”

Frost & Sullivan, 2015

This new environment is built from award-winning security capabilities, including the Unisys Stealth™ product family. Called ‘groundbreaking’ by Frost & Sullivan, Stealth originally was designed to support covert operations and serves to cryptographically hide your assets such as servers, end-points, virtual machines, and even entire data centers, while requiring no hardware or application changes. Over the last five years, Stealth has evolved to become a proven and trusted defensive component of many of the world’s most important enterprises.

Now, after 3 major releases over 6 years, Stealth provides a robust, hardened approach to solving many of the most critical security concerns facing enterprises today.

Physical security offerings protect entire country borders, establish identities for millions, automates video, and securely process images. All of this is done by leveraging advanced technology, proven intellectual property, and decades of proven experience. With enterprises acknowledging the benefits of unified physical and logical defenses, Unisys is a perfect partner.

“Unisys is a holistic security solutions provider with a broad range of solution expertise.”

Frost & Sullivan, 2015

Award Winning Security Solutions for:

- Cloud Security
- Enterprise Security
- Endpoint Protection
- IoT Security
- ICS/SCADA Security
- Data Center Consolidation
- Regulatory Compliance
- Micro Segmentation
- Access Control
- Identity Management
- Video/Image Security

It’s time to try a fresh approach to security, from a provider that’s innovatively solved many of the problems you face today. To get more information or to schedule a discussion and demonstration, please contact your Unisys sales executive or click on www.unisys.com/security to get started.
