

Security Questions and Unisys Answers

Can't architect a plan to save money and control budgets, like extend your datacenter into multiple cloud environments? We can show you how to migrate your infrastructure in a systematic way as well as manage and secure them like they are in your own datacenter.

Can't get reassurance about the privacy and security of your virtual machines in private or public clouds? We can show you how Stealth(cloud) can protect every machine connected to your cloud environment.

Can't get a realistic sense of costs to migrate to more efficient platforms? Our trusted advisors moves your business towards a secured state today and architect a plan, including resource requirements, across your distributed infrastructure.

Can't proactively identify intruders on your network? We can provide the latest threat defense and prevention through our extremely efficient service delivery capabilities.

Can't extend the security within your datacenters out to mobile applications and devices? We can show you how Stealth(mobile) can secure specific applications for that same security provided on the network.

Can't protect IP or customer data from being stolen by an insider or outsider? We can show you how to micro-segment your key assets.

Can't meet and maintain industry and governmental regulatory compliance efficiently? We can show you what QSA's are suggesting to their customers to use Stealth to reduce the scope of compliance audits.

Can't isolate vendors and contractors on your network from other assets? We can show you how to isolate those people to only those assets they are connected to.

Trusted Partners for Managing Your Global Security Risk

Protecting your business data against sophisticated and financially backed cyber criminals and managing security compliance regulations is hard to do and getting harder. Unisys' strategic consultants provide executive advisory services with real world experience by people that have sat in your seat and lived your security challenges so you can move forward with your operational initiatives.

Our strategic approach allows you to secure your data today while moving to more efficient security in a systematic way, not a future idealistic security state. We have extensive experience delivering results that our customers' mission critical environments require from with the best defenses against advanced threats to Electronic Discovery Reference Model [EDRM] and eDiscovery plans to ensure you are prepared for litigation or impact of a breach.

We work with our clients to architect your infrastructure to reduce their attack surface for the lowest risk, maintaining efficiencies, managing your company products as you grow, efficiently meeting regulatory mandates and managing security over your global supply chain including mergers, acquisitions and divestitures.

Why Unisys?

With enterprises now needing to unify their physical and logical defenses to remove gaps, Unisys is a perfect partner. We honed an elite team of consulting experts that bring real-world experience to solving all of our clients' security problems.

- Stealth(mobile)

PHYSICAL

- LPSS
- Identity Management
- Image Processing
- Fraud Detection

EFFICIENT MANAGED SERVICES

- SIEM
- Endpoints
- Firewalls
- Applications
- Assurance
- GRC
- Threat Analysis
- Data Loss Prevention
- Video/Image Management

EXPERIENCED PROFESSIONAL SERVICES

TECHNICAL

- Testing
- Incident Response
- Architecture

STRATEGIC

- CISO Advisory
- Security Assessments
- Security Planning
- Systems Integration

“Unisys Stealth™ not only strengthens data security but also enables effective controls for endpoint access.”

Frost & Sullivan, 2015

- **Strategic Consultants.** We secure our clients’ data today while moving customers to a more efficient security program, not some future idealistic state. Our trusted advisors provide executive advisory services on security, compliance and strategic planning, securing mobile devices - managing risk while meeting corporate mandates to reduce IT budget.
- **Technical Consultants.** Both for incident and non-incident related security we do vulnerability and threat assessments but also e-discovery forensic data analysis, traffic flow analysis for network slowdowns, old legacy application security, to EDRM for litigations.

- **Incident Response.** Combined fast reaction forces by security experts, and recovery management in case of a network breach with proactively resilient systems implementations and incidence response legal plans.
- **Systems Integration.** We provide industry specific expertise with infrastructures like yours to save time and money on implementing security solutions that work and best prepare you against security attacks.

The most effective security threat prevention solutions starts with determining where your business is managing risk well and where you need better protection to reduce your risk. Our world class professional services consultants are our clients’ trusted advisors for comprehensive and battle-tested risk management for their IT network and physical infrastructure to ensure the best security for your business.

“Unisys provides a security solution that is simple and easy to deploy and manage with limited disruptions, making it a precise fit for critical infrastructure protection.”

Frost & Sullivan, 2015

Award Winning Security Solutions for:

Cloud Security	Regulatory Compliance
Enterprise Security	Micro Segmentation
Endpoint Protection	Access Control
IoT Security	Identity Management
ICS/SCADA Security	Video/Image Security
Data Center Consolidation	

It’s time to try a fresh approach to your security, from a provider that’s already solved many of the problems you face today. To get more information or to schedule a discussion and demonstration, please contact your Unisys sales executive or click on www.unisys.com/security to get started.
