One Acquisition Solution for Integrated Services (OASIS)

General Services Administration (GSA)

GSA OASIS is a Multi-Agency Contract (MAC) for complex, integrated professional services (IT products & services are ancillary).

The objective of OASIS is to provide Government agencies with total integrated solutions for a multitude of professional service based requirements on a global basis.

These professional service requirements may call for solutions that cross over multiple disciplines, include ancillary support, and require commercial and/or non-commercial items, using a variety of contract types including fixed-price (all types), cost reimbursement (all types), time and materials/labor hour, or a hybrid mix of contract types.

OASIS is available for use by all Federal agencies and other entities.

Offerings

Pool 1 - Engineering, Environmental/Other
Unisys Contract: GS00Q140ADU144

Pool 2 - Accounting and Finances
Unisys Contract: GS00Q140ADU222

Pool 4 - Research and Development
Unisys Contract: GS00Q140ADU438

Features and Benefits

OASIS provides support for Commercial and Non-Commercial requirements, which means any contract type may be utilized.

North American Industry Classification System (NAICS) Pools

- Services under OASIS span 28 NAICS codes and 6 exceptions or 34 codes - exceptions in all. These 34 codes/exceptions are allocated among 7 NAICS code pools. All codes/exceptions in a pool share a common small business (SB) size standard. Agencies can solicit task order proposals from contractors holding awards in the pool with the NAICS code that matches the agency's requirement.

Standardized Labor Categories

- The labor categories are aligned with occupations, as outlined in the Office of Management and Budget's (OMB) Standard Occupational Classification (SOC) system.
- OASIS offers more meaningful proposed rate comparisons at the task order level – apples to apples, and 104 OASIS LCATs (individual and groups and priced at the master contract level) cover 127 OMB SOC occupations and over 1,000 typical industry job titles.
- The remainder of the 840 SOC occupations can be added and priced at the task order level as ancillary labor.

Price Estimation Tool

The automated pricing estimation tool

(<http://www.gsa.gov/portal/content/186523>):

- Can be used in building realistic estimates for the labor portion of requirements;
- Is a quick and easy-to-use tool for creating the task order Independent Government Cost Estimate (IGCE);
- Incorporates statistics for each SOC system occupation based on Bureau of Labor Statistics (BLS) surveys as direct rates and OASIS Awardee indirect rates, and prices; and
- Can index pricing for up to 640 precise geographic locations.

Longer-term Planning

- OASIS has no program ceiling, a five-year base and one five-year option, and provides for long term planning for complex program requirements.

Tiered Access Fee

- OASIS offers an Innovative tiered access fee, ranging from 0.1 percent - 0.75 percent based on obligation level.

Period of Performance

- Base ordering period is September 3, 2014 through September 2, 2019, with one 5-year option ordering period. Task Orders may run up to 5 years past date of expiration.

Why Unisys?

Unisys is committed to service excellence as measured by our clients' satisfaction and loyalty to Unisys. We collaborate with our clients and deliver innovative solutions to optimize their business and positively impact their customers.

When our clients win, we win. Successful clients drive the growth of our business, hence our focus on client satisfaction not just as an outcome, but as a means of executing throughout our journey together.

This is how Unisys highly satisfies clients and earns their loyalty:

Service Excellence

- Deliver greater client value and improved customer experience based on continuous improvement and applied innovation, enabled by CMMI, Six Sigma Lean, data analytics and our unique ProAct™ methodology.
- Leverage flexible, standardized methods, tools and artifacts from past engagement experience.
- Apply best practices from industry standards/frameworks such as PMI PMBOK, ITIL, ISO and CMMI, throughout the engagement lifecycle.
- Develop outstanding talent by continuous education through role and skill based learning paths, support for industry certifications, on-the-job development opportunities, support from communities of practice and social media.
