

Security Questions and Unisys Answers

Can't take actionable steps from security event monitoring tools? Let us show you how our Unisys Noise Cancellation Advanced Analytics Platform (UNCAAP) system works to handle 300 million security events every day, then aggregates and correlates them for actionable intelligence.

Can't keep IT security members on staff to monitor your security? Let us show you how we manage your security for you 24x7 with our 8 global security operations centers eliminating complexities related to recruiting, training, retaining IT security staff.

Can't quickly determine your businesses security posture and effectiveness of your security controls? Let us show you how we measure and regulate the effectiveness of internal controls to various industry and other regulatory standards.

Can't lower security and IT costs after consolidating your datacenters? Let us show you how to lower your security risk, reduce your security infrastructure complexity and substantially reduce your ongoing operating costs with our security services delivery.

Can't manage your devices to meet your security policies? Let us show you how our services align your security devices to your policies, processes and technologies making for a holistic security view and improving your security posture.

Can't get a straight, conclusive answer on whether there is advanced malware on your network? Let us show you how we use our Next Generation Threat Protection (NGTP) to detect anomalous activity using best of breed technologies to give you a greater comfort level.

Expert Security Risk and Compliance Management so You Can Focus on Your Business, not Advanced Security Threats

As businesses extend their IT organization beyond the data center and into cloud and virtual environments - and become borderless - to drive down IT costs, substantial challenges are created with being prepared for advanced security threats, maintaining compliance and assessing their overall security risk management.

This new borderless global world is under constant attack from continuously evolving threat landscape. In today's environment, traditional point solution based siloed approach is futile. Protection of enterprise wide distributed critical information requires a holistic, comprehensive and integrated security strategy. Enterprises need state-of-art technology, skilled resources, threat intelligence and significant management attention to safeguard against sophistication of threats.

An enterprise security strategy is required to manage overall risk. An effective strategy must have solutions for protecting IT assets, securing cloud applications, protection against web 2.0 threats, securing mobility devices and safeguard the intellectual property.

Unisys brings logical and physical unified security to our clients, so they can focus on their core competencies. **Managed Security Services** deliver comprehensive real-time protection solutions, facilitating organizations to manage overall risk, improve security posture, prevent emerging threats and demonstrate compliance in a cost-effective manner. **Managed Security Services are available in stand-alone or a complete suite modes.**

- **Managed SIEM (Security Information and Event Management)** services provide cross-enterprise event collection, sophisticated event analytics based on Unisys proprietary UNCAAP methodology and a log management solution to deliver actionable alerts, holistic enterprise view and a secure management dashboard.
- **Security Device Management services** help enterprises focus on their core business by managing their overall security infrastructure remotely.
- **GRC services** provide professional services that help customers to meet their risk mitigation or compliance objectives.
- **Managed Identity and Access Management Services** provide our clients with additional security and dual Factor Authentication service.

Why Unisys?

Our mature, validated security services delivery capabilities and reporting services are key to the risk management solutions we provide, improved after many years of honing our capabilities for our clients.

Managed Security Services (MSS). Managing security is not a business core competency, so our trusted advisors help our clients offload the day to day cloud, network and endpoint security management to our experts 24x7. Our 8 Security Operations Centers correlate 300 million client security events every day, with room to expand.

“Unisys has security integrated into its mission. Unisys’ MSSP business helps organizations raise their security posture and, as a result, fully meet their compliance obligations.”

Forrester, 2014

Award Winning Security Solutions Portfolio:

ADVANCED PRODUCTS

LOGICAL

- Stealth(core)
- Stealth(cloud)
- Stealth(compute)
- Stealth(mobile)

PHYSICAL

- LPSS
- Identity Management
- Image Processing
- Fraud Detection

EFFICIENT MANAGED SERVICES

- SIEM
- Endpoints
- Firewalls
- Applications
- Assurance
- GRC
- Threat Analysis
- Data Loss Prevention
