The Top 4 Economic Reasons to Consider Unisys Stealth®

With the cyberattack surface-expanding and insider attacks on the rise, your organization can no longer depend on perimeter security alone. It’s time to invest in a more comprehensive approach.

But as with any investment, you need to focus on the finances. That’s why Faron Wessner, a manufacturer and servicer of fluid motion control solutions, compared the costs and benefits of Unisys Stealth against those of another offering. In the end, he picked Unisys Stealth.

Wondering why? Consider the top 4 ways Unisys Stealth can help you cut costs—while better protecting your organization.

**1. Lowering Risk Profile**

To efficiently protect the critical you need to strategically defend your organization against both outsider and insider threats. Only cost-effective, encrypted microsegmentation restricts access to sensitive data to those who need it—while avoiding unnecessary expenses.

With Unisys Stealth, Faron Wessner saved $2.2 million and reduced his risk footprint by 70%.

**2. Streamlining Security for Regulatory Compliance**

Need to streamline compliance audits and more quickly meet regulatory requirements for data security? Start with a single, standardized approach to safeguarding your organization.

By empowering his team across his global locations with Unisys Stealth, Wessner achieved $360,000 in annual compliance cost savings.

**3. Reducing Operational Complexity**

By reducing your organization’s reliance on expensive physical infrastructure, you free up resources required for maintenance and support. That means more time for your team to focus on what they do best.

Possibly reducing $10.6 million over a three-year period, Unisys Stealth saves your organization $14 million in annual resources.

**4. Simplifying Scalability**

A comprehensive security strategy is a future-focused security strategy—one that grows alongside your organization. Boost your flexibility and avoid overbuilding—and the costs that come with it—by opting for a globally scalable solution.

“Costs associated with complex, ad-hoc approaches are over 10 times higher than those associated with our baselined, comprehensive, high-assurance approach,” says Dan Storlazzi, a key leader in cybersecurity.
