

Building a Better Future Through Smarter Energy Solutions

The Business Challenge.

Deliver differentiated energy solutions across the value chain (upstream and downstream), and develop technologies leading to a more sustainable future.

The Solution.

Unisys Security Consulting services to provide analysis, diagnosis and POCs of security components of potential application in the client's organization; these services include analysis of solutions for the client's virtual data center (hosted on a private cloud), and for public/hybrid cloud security.

Results and Benefits.

- Mitigated network breaches to protect the client's architecture against security hacks
- Identified and managed risk to prevent digital and physical vulnerabilities
- Defined the technical architecture to be aligned with a comprehensive incident response plans for any potential cyber-attacks
