Making Communities Safer by Upholding the Law, Preventing and Investigating Crime, and Bringing Offenders to Justice

The Business Challenge.
Protect and reassure communities by reducing threat and risk to the nation.

The Solution.
Digital Investigator™ solution, configured to support specific information management and operational requirements, to harness a number of disparate databases into a single coherent national view of the data sets; includes the investigative management of crime/intelligence cases from report/lead to prosecution.

Results and Benefits.
• Achieved a single, national view of specific information with access controls, and consistency in approach to capturing, assessing and indexing intelligence across all forces
• Improved detection rates, earlier identification of developing risks and threats to the country, and safer life on the street
• Gained significant cost savings through rationalized licensing and support
