

Powering Omni-Channel Banking with Secure, Reliable Financial Transactions

The Business Challenge.

Ensure the continued success of member regional banks across Argentina.

The Solution.

Unisys core banking, retail delivery solutions, and application modernization; services including platform upgrade and migration services, and maintenance of industry applications.

Results and Benefits.

- Achieved market leadership and differentiation
- Improved 'anytime' financial services to an expanded customer base by allowing them to transact seamlessly across channels
- Minimized time-to-market for new financial services and products
- Reduced total cost of ownership

“After three years of searching, we have found in the Unisys solution a technological platform that meets the applications architecture needs for the digital transformation required by the banks. We know that the technology behind our operations is quite important and has a direct impact on the services we provide to our customers. In this project we were looking for a technological partner that could provide us with an end-to-end solution, from the design and migration to the new platform to the maintenance with high levels of service.”

David Estevez
CIO, Petersen Group
