

## Serving the Growing Needs of Western China's Aviation Market Through Its Busiest Airport

### **The Business Challenge.**

Expand and modernize the airport to meet growing passenger volumes.

### **The Solution.**

Unisys integrated more than 20 disparate systems, and designed and implemented the airport operational database, flight information system, airport middleware, and flight information query system; Unisys also led the overall systems integration and interface design, testing, commissioning for the new Terminal 2 and the integration of the new database with Terminal 1; Unisys was the subcontractor to the project's prime contractor Sinotec, a Unisys partner in aviation industry in the Asia-Pacific region.

### **Results and Benefits.**

Reported handling 30+ million passengers annually without impacting flight and baggage handling operations.

"As one of China's fastest growing airports, we require a highly efficient, flexible IT system to support the expected increase in passenger numbers and ensure a positive experience for air travelers. The Unisys solution gives us the operational platform we need to move confidently into the future."

**Wu Ding**  
**Chief Engineer**  
**Chengdu International Airport**
