

## Securing Systems and Data Critical to Providing Energy Services Across Northeastern United States

### **The Business Challenge.**

Provide reliable energy and natural gas to 3.6+ million homes and businesses without any risks of security threats.

### **The Solution.**

Unisys Stealth® to cryptographically cloak endpoints from unauthorized traffic and proactively protect data by restricting communication to pre-authorized groups called Communities of Interest; Stealth secured specific to create segments within the organization's IT environment where only authorized users can access information.

### **Results and Benefits.**

- Protected confidential customer data from malicious security threats
- Reduced hundreds of thousands of dollars in support costs per year

“As one of the largest US based utility companies, we are delivering energy services to homes, businesses, offices and communities across New England. With Unisys Stealth, we are strengthening this commitment even further by ensuring that our systems are safe and are protected from cyber threats.”
