The Business Challenge.
Ensure passengers and baggage travel together to comply with Aviation Security Act’s “Triple A” regulations; for BARNZ, this involves 20+ international airlines operating in New Zealand from four airports at Auckland, Christchurch, Queenstown and Wellington.

The Solution.
Cloud-based advanced Baggage Reconciliation System (BRS) including managed services, network infrastructure, security architecture, handheld scanners, staff training and 24/7 help desk support; 3G and 4G scanning; Unisys Messaging to provide connectivity to all airlines.

Results and Benefits.
- Improved security and operational efficiency without impeding passenger flow
- Reduced cost and streamlined passenger service with measurable reductions in lost and mishandled bags
- Increased operational flexibility and IT scalability with the ability to handle increased volumes
- Enabled real-time visibility and therefore greater efficiency into baggage outcomes (lost bags)
- Ensured continued compliance with the Government’s Office of Transport Security regulations

“Secure and efficient baggage handling is a key issue for both airlines and their passengers. The Unisys baggage reconciliation system helps our member airlines comply with industry-mandated security requirements for baggage handling, while providing efficient processing to quickly find or remove baggage to help prevent delays.”
