solutions

## Digital Workplace Services

Transform your end-user collaboration platforms, services, and productivity solutions into a modern, cloud-based, mobility-enabled digital workplace

- End-to-end Solution with Deep System Integration Expertise
- Innovative, Automated Persona-based Solutions
- Cloud-first Approach with Built-in Security
- Field Engineering Services with 15 Service Desk locations, 12 Command Centers and 16 Data Centers worldwide
- Improving employee satisfaction with Unisys IntelliServe™

*“Unisys is investing in and growing our business in Japan with a suite of software-led services, such as Unisys Stealth® and Unisys IntelliServe™, to empower a secure modern workplace, enhancing productivity and collaboration with cloud-based and mobile-centric solutions.”*

*Peter A. Altabef, Unisys Chairman and CEO*

*“Unisys’ digital workplace services and plans address many of the changes and challenges ISG sees in enterprises.”*

*Jan-Erik Aase, Global Director, ISG Provider Lens*

*“Unisys is a longstanding partner in Henkel’s ecosystem for more than 10 years. They are helping us in many ways to improve end user security, manage help desk operations and operate data centers.”*

*“Gained the ability to deliver the same, high quality IT services across 35+ countries in more than a dozen languages.”*

## Security Solutions

Premium solutions, including Unisys Stealth®, to quickly isolate cyber threats and build security into everything we do

- Zero Trust Security built on identity-based encrypted microsegmentation
- Security Consulting Services for managing your global security risk
- Incident Response Ecosystem for proven strategies for faster responses with minimal business impact
- Managed Security Services isolating critical data and systems in minutes

e<sup>pm</sup>

*"We had to boost our security to keep unauthorized people from accessing information of the thousands of operations that run every day across our IT infrastructure. Unisys security and analytics services are detecting threats and enabling us to continue to deliver our high quality services to citizens."*

*Antonio Pérez  
IT Infrastructure Director, EPM*

## Travel and Transportation

Providing comprehensive modern and modular applications and solutions to support the largest, most sophisticated travel and transportation needs from the traveler, to the baggage/cargo and the background logistics.

**AirCore®** is a comprehensive suite of open platform Passenger Solutions and Services on the cloud that provides improved airlines reservation systems, departure control, predictive re-accommodation, analytics, timeline, etc. for airlines.

**Digistics™** provides an end-to-end cargo management solution from booking to warehouse management to tracking and reporting deliveries.

**Airport Operations Suite** provides airports a 360-degree view helping operational staff be proactive and optimizing the use of scarce resources.

*"By delivering a world-class solution, Unisys has enabled Guangzhou International Airport to be equipped with the best information systems infrastructure among Chinese airports."*

Dell Technologies

### Transforming IT through essential infrastructures

*"We love working with Unisys because Unisys pushes us to be better. They force us to think through process changes in our supply chain or new engineering features that we need to build into our products or modifications we need to make to our*

*support models. And together, that means we provide better value to end users and customers."*

*Joyce Mullen, Senior Vice President, Global OEM and IOT Solutions, Dell Technologies*
