

Overseas NEXRAD and TDWR Radar Data including South Korea, Guam and Puerto Rico

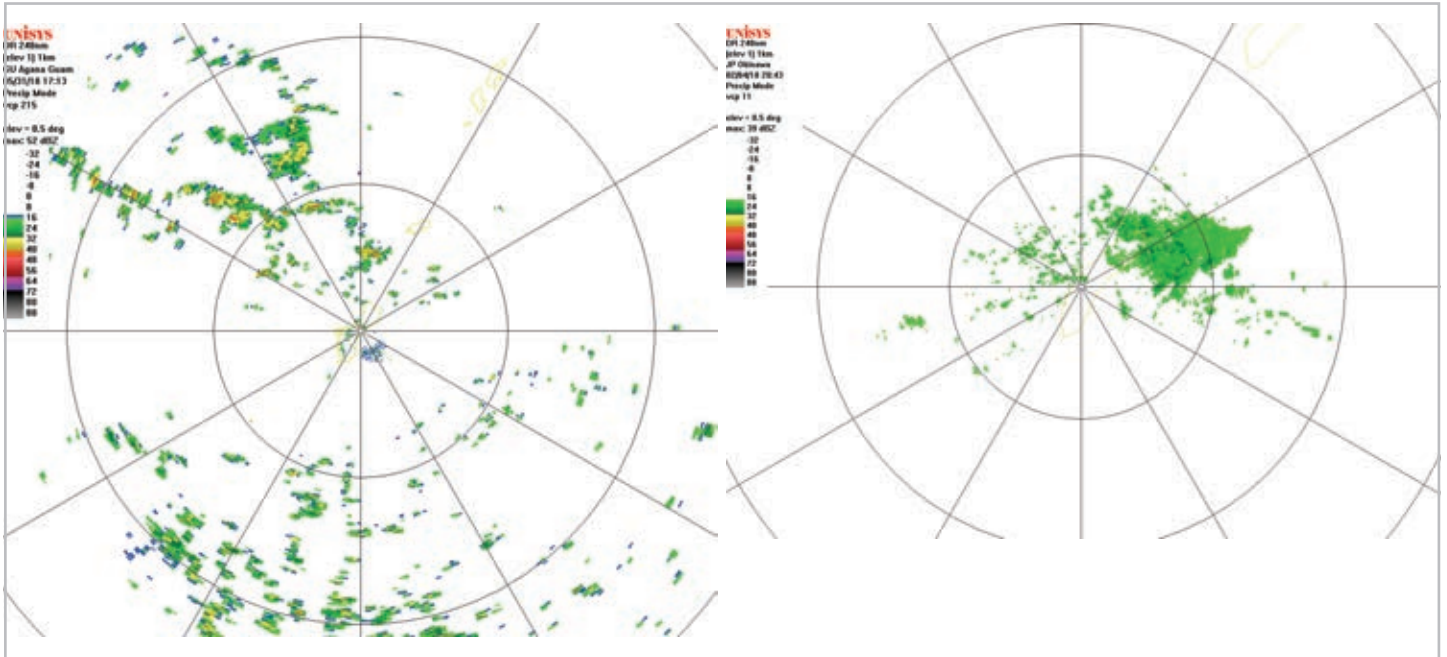

South Korea Base Reflectivity Mosaic

Unisys base reflectivity radar mosaic of data from the NEXRAD sites in South Korea. Other mosaic types such as precipitation accumulation, echo tops and vertically integrated liquid are available from Unisys.

Nexrad Single Site Data from Puerto Rico

Hurricane Maria made landfall with a direct hit on Puerto Rico on September 20, 2017 with reported Category 4 maximum sustained winds of 155 MPH at the surface. Shown above is an image from 950Z on the 20th from the San Juan WSR88D as the outer edge of the eyewall reached the radar location. The radar suffered extreme damage but has since been repaired.

Nexrad Single Site Data from Guam and Okinawa

Shown here are Nexrad Base Reflectivity Products from Guam (on the left) and Okinawa (on the right). The complete set of Nexrad products including velocity, echo tops, etc. from the overseas sites such as Guam, Okinawa, and Puerto Rico are available from Unisys.

The future of weather technology is now.
